### **Oaks Development Group partners with Ecumenical Center for Religion and Health to present Advanced Gestalt Play Therapy Workshop**

(SAN ANTONIO, TX, June 16, 2009) -- North Carolina-based Oaks Development Group had the privilege of working with the Ecumenical Center for Religion and Health in San Antonio to bring Felicia Carroll, LMFT, RPT-S, to present a three day workshop on Advanced Gestalt Play therapy. The workshop was attended by area physical and occupational therapists along with local pediatric neurologists and physicians.

Catherine Parten, Director of Child & Family Services, at the Ecumenical Center for Religion and Health shared, "I think we often dismiss the wonderful gift we give to our community. Thanks to Oaks Development Group for funding our workshop and their support of the Center. We were able to reach so many healthcare providers who generally would not be able to participate in this type of quality workshop we just presented to our community without their help." Parten continued, "I think Oaks should be applauded for this kind of support and awareness of what our community needs."

Representing Oaks Development at the workshop was Greg Brock, partner with Oaks Development Group. Brock said, "Oaks Development Group believes in becoming a part of the community where it does business. We've been working with the Center for the past two years as a part of the Ethics in Business program. Oaks continues to move forward with our projects in Westover Hills, The Medical Center, and Shavano Oaks II projects and we believe this is the beginning of many business opportunities in the San Antonio market."

Kim Oaks, a member of the Texas Development Team, shared, "The Ecumenical Center is a good fit for the values and philosophy of Oaks Development Group. The prospect of being able to join forces with the Center to bring Felicia Carroll to San Antonio was something Oaks really wanted to be a part of. Carroll's workshop enabled health care providers to utilize the skills learned in order to increase the quality of care for special needs children." Oaks continued, "If just one child's therapy can be improved, then our efforts will reap great dividends, but we feel confident that many,

many children and their families will benefit from Carroll's workshop for San Antonio and the surrounding area community healthcare providers."
